1 Introduction

The **Government of India** had decided that to measure and monitor India's performance on various social, economic and other parameters through internationally recognized **Global Indices**.

The goal of this exercise are to use these Indices as tools for self-improvements and bring about reforms in the policies and processes of Government agencies and bring about reforms in the policies and processes of Government agencies and financial institutions while creating a conducive ecosystem for foreign and domestic investment flow.

Goals

- Driving reforms at the National and State level by ranking of States
- Promoting cooperative and competitive federalism
- Enhancing citizen service delivery, ease of living and ease of doing business

About the dashboard:

The dashboard is created to support the Government's decision to leverage the monitoring mechanism of select global indices to drive reforms and growth. The dashboard allows for monitoring of the parameters as per official data as well as the data source used by the publishing agency. The dashboard also allows for monitoring of performance of states and it also inculcates healthy competition among States/UTs through their scoring and ranking on these Indices and Reform Actions.

This manual illustrates the functionality for Global Index Module, its creation, mapping and Data Entry and functions at various user levels. Care is taken to explain each function minutely.

1.1 Purpose

The purpose of this user manual is to provide an insight on the operations of Global Index Module. This manual serves the requirement of users like DMEO, Nodal Administrator, State/Line Administrators and Data Entry Users to how to create, assign, map and approve the Global Index.

As you complete reading this document, you will be able to:

- Create Global Index, Map with Nodal Ministry
- Map Global Index with Countries
- Create India Index, Add Themes/Parameters, Sub Parameters to Global Index
- Map India Index with Users
- Enter Scores and Ranks to India Index
- Data Approval
- Visualize Data in Visualization

Note:

Themes and Parameters Added after adding Global Index are not reflected in respective India Index.

Nomenclature: India Index carries “_India”.

You can Select the Level, Index, Theme, Parameter/Sub Parameter while Creating Global Index.
